Message from Principal, School of Law

The debate competition is an attempt at creating a simulated atmosphere for the development of intellect and argumentative dialogue. The objective is to enable the students to explore their ideas and vision on the technology of artificial intelligence which is a current and important topic.

The development of core skills like Legal consistency, factual accuracy and some degree of emotional appeal to the audience are pivotal in debating, where one side often prevails over the other by presenting a superior framework of the issue.
